Solution Manual for: Linear Algebra by Gilbert Strang John L. Weatherwax* January 1, 2006 Introduction A Note on Notation In these notes, I use the symbol \Rightarrow to denote the results of elementary elimination matrices used to transform a given matrix into its reduced row echelon form. Thus when looking for the eigenvectors for a matrix like $A = \begin{bmatrix} 0 & 0 & 2 & 0 & 1 & 0 \end{bmatrix}$

Linear algebra moves steadily to n vectors in m -dimensional space. We still want combinations of the columns (in the column space). We still get m equations to produce b (one for each row). Those equations may or may not have a solution. They always have a least-squares solution. The interplay of columns and rows is the heart of linear algebra.
